Summary

Highly motivated AI & ML engineer with strong expertise in Python, SQL, and Data Science. Experienced in computer vision, and predictive modeling with practical exposure to building and deploying scalable solutions. Passionate about creating impactful projects that drive real-world change.

Education

Jyothy Institute of Technology (VTU)

Bachelor of Engineering in Artificial Intelligence and Machine Learning

Bengaluru

July 2026

GPA: 8.5

Core Skill Set:

Collaboration, Problem Solving, Leadership, Team Management, Adaptability, Remote Teamwork, Agile Methodologies

Key Skills:

Python, Java, C, R, HTML, CSS, SQL, MySQL, MongoDB, AWS, Google Cloud, Tableau, Power BI

Credit linked program in Data Science

Daksh Gurukul - IIT Guwahati

Guwahati

May 2026

GPA: 9.1

Experience

WizzyBox Pvt. Ltd.

AI Engineering Intern

Bengaluru, Karnataka

September 2025 - Present

- Developed a full stack Learning Management System using React and Django REST Framework, supporting 500+ active users and reducing manual academic coordination efforts by 40%.
- Designed and deployed 25+ RESTful APIs and optimized SQL queries, improving data retrieval speed by 35% and reducing server response time.
- Implemented secure authentication and role-based access control for 3 user roles, achieving 100% secure endpoint protection and zero unauthorized access incidents.

Outlier.ai

Freelance AI Contributor

Remote

Nov '24 – Jan '25

- Elevated** AI model accuracy by 20% through rigorous testing, evaluation, and refinement of model outputs across summarization, translation, and diverse content types.
- Enhanced** reasoning capabilities in domains such as economics, medicine, law, and psychology by supporting RLHF workflows and developing human-aligned AI models.
- Streamlined** data training pipelines by curating structured multilingual and multi-domain datasets, improving scalability, usability, and reliability of AI systems.

Projects

AI - Driven Smart Traffic Management System using Federated Approach

- Developed** an AI based smart traffic management system using YOLOv8 to detect vehicles, pedestrians, and emergency vehicles in real time from CCTV feeds.
- Implemented** a federated decision - making model to dynamically control traffic signals, prioritize emergency vehicles, and optimize traffic flow using live video data.
- Built an end-to-end system using Python, PyTorch, OpenCV, and Flask with real time visualization and GPU accelerated inference for high performance execution.

A Cost-Based Restaurant Clustering and Location-Based Recommendation System

- Developed a machine learning model using **K-Means Clustering** to group restaurants based on pricing and features, achieving a Silhouette Score of 0.6 for cluster quality. Used **Python, FAST API for backend and HTML, CSS for frontend**.
- Integrated Google Maps API to offer dynamic, location-based restaurant recommendations. Enhanced user decision making by recommending cost-effective dining options nearby.
- Project findings published in **JETIR** (UGC Care - approved Journal) – [link](#)

Spot the Job Scam

- Built a full-stack web application to detect fraudulent job postings using ML.
- Trained a Logistic Regression model with TF-IDF vectorization, achieving an F1-score of 0.84 with high precision.
- Designed a React + TypeScript + Tailwind CSS frontend with real-time predictions, confidence scoring, and keyword highlighting.
- Implemented a Flask (Python) backend with REST APIs and deployed the system via Netlify (frontend) and Render (backend).

AI for Pandemic Prediction

- Built a **linear regression** model to predict pandemic potential using global COVID-19 data.
- Engineered an impact metric combining 4 key health indicators to quantify outbreak severity across 150+ countries.
- Developed a **Streamlit** dashboard enabling real-time prediction and visualization of pandemic risk from uploaded datasets.

Certifications

- Introduction to Generative AI Learning Path - Google Cloud Skills Boost
- Career Essentials in Generative AI by Microsoft and LinkedIn
- Gemini in Google Workspace (including Gmail, Docs, Meet, Sheets and Slides)
- AWS Academy Graduate - AWS Academy Machine Learning Foundations
- Data Visualization: Empowering Business with Effective Insights simulation by Tata on Forage
- Data Science with Python by Simplilearn
- AWS Academy Graduate - AWS Academy Cloud Foundations
- Google Cloud Computing Foundations Certificate
- Dream Builder Program by Thunderbird School of Global Management, Arizona State University, AROH Foundation, FIS Global and Freeport-McMoRan

Publications and Presentations

- **Journal Publication:** Frugal Foodie: A Cost-Based Restaurant Clustering and Location-Based Recommendation System; Journal of Emerging Technologies and Innovative Research (JETIR), Vol. 12, Issue 5, May 2025.
- **Conference Presentation:** Presented at the 11th National Conference on Advancements in Information Technology (NCAIT), JSSATE, Bengaluru, May 2025.

Club and Extracurricular activities

- **Assistant Editor, JITIMES** - College Magazine, contributed valuable insights and actively participated in the editing process, enhancing the quality of the magazine
- **Student Placement Coordinator** - Managed campus placement drives by coordinating with recruiters and students, ensuring smooth execution while fostering teamwork, communication, and leadership skills.
- **LinkedIn profile manager** at Girls Leading Tech
- **Won 2nd price** in **CSI Project Exhibition** - JIT
- **Documentation lead** of AI Nexus club - JIT
- **Python Workshop Instructor** - Conducted a Python workshop for juniors, mentoring them on foundational programming concepts and best practices.
- **Master of Ceremonies** - Served as the Master of Ceremonies (MC) for Pranathi, our college's annual techno-cultural fest, showcasing strong public speaking and event-hosting skills.
